

MARY FLY MEMORIAL SCHOLARSHIPS FOR DRIVER EDUCATION

APPLICATION PACKET

General Information for Scholarship Applicants

WHY IS DRIVER EDUCATION NEEDED?

Teenagers have more traffic crashes, resulting in higher insurance, injuries and death. Research has shown the driving problems of teenagers to be the result of driving inexperience, lack of adequate driving skills, driving during high risk hours, risk taking, and poor driving judgment and decision-making. In the mountains areas, there are other contributing factors, including road conditions and weather.

Driver Education can help reduce traffic crashes by giving students a better understanding of how drivers interact with the driving environment, knowledge about the driving process, improved driving skills, and better risk perception and decision-making. While parents and guardians have an important role to play in teaching their children to drive, they can be assisted and supported through Driver Education.
